In this bulletin

This issue of the bulletin is similar to the one of the previous month, except for the deletion of a few courses already held and the addition of some information for others. There are still plenty of places in interesting courses, while courses by NTEC and University of Manchester are saturated. So, please diversify your choices.

We now suggest that, if you apply for support by the ENEN+ project, you prompt the Course Providers about this, soon at the time of being contacted. This may help in getting support.

Thanks for your interest in our courses!

COMING SOON COURSES

2-days Workshop on “Proliferation Resistance Methodologies for Nuclear Installations”
SCK•CEN (Brussels), Belgium (November 22-23, 2018)

WORKSHOP CONTENT
The goal of this workshop is to apply and compare different proliferation resistance methodologies in a case study of a nuclear installation. The characteristics of the installation taken as case study is presented at the start of the workshop. Then, the principles of several proliferation resistance methodologies are introduced and realistic examples are shown. After the introduction of each methodology a table-top exercise is prepared to give the possibility to the participants to apply directly the methodology. Large sections of the workshop are dedicated to the application of the different methodologies to the specific case study and discussion of the results among the participants. A comparison of the methodologies is foreseen at the closing of the workshop.

REQUESTED BACKGROUND
This workshop is intended for professionals that are involved in nuclear safeguards tasks in their organization. Knowledge of nuclear safeguards is required to attend the workshop. The principles needed to apply each proliferation resistance methodology are presented before the table-top exercise.
Principles of Radiation Protection. International Framework. Regulatory Control (e-learning)

Course Outline and Content:
The course is aimed to provide advanced knowledge of fundamental radiation protection principles applied to planned, emergency and existing exposure situations. The content will offer the theoretical and practical understanding of the European and international radiation protection legal framework, the regulatory control concepts to achieve an appropriate standard of radiological protection.

The programme is addressed to:
Radiation Protection Experts or Officers, Medical Physics Experts, Nuclear specialists, Specialists from other disciplines demanded in the nuclear workforce and to those who are interested in continuous professional development in order to cover present needs in different sectors of nuclear energy and ionizing radiation applications.

The course is structured as follows:
Unit 1 – Principles of radiation protection (1 ECTS)
Unit 2 – International Framework. Regulatory Control (1 ECTS)
Detailed Learning Outcomes are reported at this link
Requested Background:
The learner is assumed to have basic knowledge of Physics, Engineering (EQF Level 6).

Lecturers:
Mrs. Gabriela Rosca-Fartat
Mr. Gabriel Stanescu, PhD
"Horia Hulubei" National Institute for Physics and Nuclear Engineering (IFIN – HH)
Nuclear Training Centre
30 Reactorului, RO-077125, Bucharest-Magurele, Romania

Method of Delivery:
Asynchronous e-learning. Links to the course material will be provided at a later stage.

Final Examination: multiple-choice test

Date of availability of the course material: 15 September 2018

STILL FREE PLACES IN AN INTERESTING HANDS-ON COURSE

CZECH TECHNICAL UNIVERSITY IN PRAGUE
Course on VR-1 Reactor (new date being agreed with participants)
THE BELGIAN NUCLEAR EDUCATION NETWORK

BNEN Courses: the full available programme proposed for ANNETTE in a modular fashion (ACADEMIC CALENDAR)

- Nuclear fuel cycle (3 ECTS) (8-12 October 2018)
- Radiation protection (3 ECTS) (15-19 October 2018)
- Nuclear thermal hydraulics (5 ECTS) (3-14 December 2018)
- Nuclear reactor theory (6 ECTS) (7-25 January 2019)
- Safety of nuclear power plants (5 ECTS) (11-22 February 2019)
- Advanced nuclear reactor physics and technology (3 ECTS) (11-15 March 2019)
- Advanced nuclear materials (3 ECTS) (18-22 March 2019)
- Advanced radiation protection radiation ecology (3 ECTS) (19-23 November 2018)
- Advanced courses of the nuclear fuel cycle (3 ECTS) (25-29 March 2019)
- Nuclear and radiological risk governance (3 ECTS) (1-5 April 2019)

STILL COLLECTING APPLICATIONS FOR FPS@KIT SCHOOL

COURSES OFFERED BY THE FRAMATOME PROFESSIONAL SCHOOL (FPS) AT KIT FOR ANNETTE

- Reactor Exercises (on agreement: 4th quarter of 2018)
- Design Basis Accidents for Light Water Reactors and Numerical Simulation Tools (April 2019)
- Computational fluid dynamics with OpenFoam (November 2018)
- Design of Pipelines against Earthquake Loads (on demand)

AN EXTENDED OFFER BY FPS@KIT FOR ANNETTE (TENS OF PLACES)

- Monte Carlo criticality and shielding calculations (12.11. - 16.11.2018) (link)
- Reactor physics calculations with deterministic methods (link)
- Beyond-design accidents, core-melt accidents (link)
- Thermohydraulic Stability Analysis (link)
- Radiolytic Gas Management in Boiling Water Reactors (link)
- Stress Analysis (link)
- Light Water Reactor (LWR) core design and fuel management (link)
- Light Water Reactor (LWR) core feedback and transient response (link)

For a general description of course conditions, look at this link
Courses by CEA INSTN (FREE of CHARGE FOR ANNETTE)

- **PWR operation and safety** (3-7 December 2018) [Click here for the Learning Outcomes]
- **Thermal Hydraulics and safety** (14-18 January 2019)
- **Materials for Nuclear Reactors** (21-25 January 2019)
- **Nuclear fuels for light water reactors and fast reactors** (28 January - 1 February 2019)
- **Neutronics for light water reactors** (11-15 March 2019 and 18-22 March 2019) [Click here for the Learning Outcomes]

The theoretical lectures and exercise material are already posted. Videos for theoretical lectures and applications fully available.

MASSIVE OPEN ONLINE COURSE ON NUCLEAR SAFETY CULTURE
By TECNATOM and UNED

MOOC (Massive Open Online Course):

*Introducing safety culture and its application to the nuclear field*
A completely online, free, international course. General information about the MOOC is available in the link above.
30 h of participant work – 1ECTS
Divided in 4 independent NOOCs (Nano Open Online Courses):
NOOC I. What is safety culture?
NOOC II. Understanding Nuclear Safety Culture
NOOC III. Developing leadership for safety
NOOC IV. Refreshing Nuclear Basics

Open now the free registration, by clicking on each NOOC above.
Provisional starting date: February 4th 2019, we are actually in the production process!
If you want to receive information about the MOOC/NOOCs, please fill the form here

We highly thank those advertising this initiative within the nuclear sector, but as well towards professionals from other industries (specially high-risk industries), as well as master students of nuclear and other technical studies, to gather a varied audience to enhance global networking and a collaborative learning experience. This course will allow a research study and its dissemination is crucial to achieve massive participation from the main target groups.

COURSE ON RADON AND ITS RADIOLOGICAL IMPACT
IFIN – HH (22 - 24 October 2018)

European Nuclear Education Network Association
